

Fields shown for stream discharge and water temperature monitoring stations used in the Sacramento Fish & Wildlife Office's Chinook salmon web portal.

FIELD NAME	FIELD DESCRIPTION
CAMP STATION NUMBER	A unique code assigned to a monitoring station by the U.S. Fish and Wildlife Service's Comprehensive Assessment and Monitoring Program.
LOCATION NAME	A unique geographic place name assigned to a monitoring station. When available, the location name is the one assigned by the U.S. Geological Survey (USGS). If a USGS location name for a monitoring station does not exist, the location name is the one assigned by the California Data Exchange Center (CDEC).
WATERSHED	The watershed where a monitoring station occurs.
STATION TYPE	The type of monitoring station. Options consist of stream discharge, water temperature, or stream discharge & water temperature.
CDEC SITE ID NUMBER	A unique code used by the CDEC to identify a particular monitoring station.
USGS STATION NUMBER	A unique code used by the USGS to identify a particular monitoring station.
STATIONED OPERATED BY	The entity that operates and maintains the monitoring station.
SECONDARY UTM NORTHING (NAD83 ZONE 10)	The Universal Transverse Mercator (UTM) northing coordinate for the monitoring station. Provided in a North American 1983 datum, UTM zone 10 coordinate system.

SECONDARY UTM EASTING (NAD83 ZONE 10)	The Universal Transverse Mercator (UTM) easting coordinate for the monitoring station. Provided in a North American 1983 datum, UTM zone 10 coordinate system.
WATER TEMPERATURE PERIOD OF RECORD START DATE	The first date when water temperature data for a particular monitoring station are available via a USGS or CDEC website.
WATER TEMPERATURE PERIOD OF RECORD END DATE	The last date when water temperature data for a particular monitoring station are available via a USGS or CDEC website.
DISCHARGE PERIOD OF RECORD START DATE	The first date when stream discharge data for a particular monitoring station are available via a USGS or CDEC website.
DISCHARGE PERIOD OF RECORD END DATE	The last date when stream discharge data for a particular monitoring station are available via a USGS or CDEC website.
BASIC SITE INFORMATION NOTES	Miscellaneous notes pertaining to a particular monitoring station, with special emphasis on describing similarities or differences between USGS or CDEC location names and/or site id/station numbers.
INTERNET HYPERLINK	An Internet hyperlink providing access to raw data for the monitoring station. When available, the hyperlink is the one provided by the USGS. If data for a station are not available through the USGS website, the CDEC hyperlink is provided.
